```python
Altitude=int(input("please enter your altitude\n"))
if (Altitude>6000):
    print("please go around,and reduce the altitude")
elif (Altitude<=6000) and (Altitude>3000):
    print("Try to land")
elif (Altitude <=3000):
    print("land the plane")
```

    please enter your altitude
    5000
    Try to land
